

\$11 billion already counted in fraud, now the possibility of even more? Referring to the allegations of MCI rerouting phone calls to avoid paying charges to local phone companies.

As a normal sane person, I believe MCI/ WorldCom should be disbanded and anyone in management in that company being barred from ever working in a management position in ANY field.

I realize they're being fined several hundred million dollars, but if you give me \$11 billion first, I'd gladly pay the million dollar fines.

Please don't let this company do business with our government. We have enough problems without their added help. On the other hand, maybe they can help our country out of all this national debt, or at least give the appearance of it.

Thank you for hearing my opinion.
